

Health Data & Evaluation Division

Services & Programs

Communicable disease and epidemiology staff engage in the prevention, investigation and control of reportable diseases and outbreaks. Other staff members manage and coordinate grants used to acquire resources as well as plan and prepare responders and hospitals for public health emergencies throughout the 16-county region of southeast Nebraska.

Data on health status, including births and deaths as well as lifestyle and risk behaviors, are collected and maintained by our Epidemiology/GIS staff members. Data and reports may be found by clicking the “Health Data & Evaluation Home Web Page” link below. The most up-to-date data is available there and within the dashboards listed below.
